SUMMARY

I'm Nguyen Quoc Hung a frontend developer with 2 years of experience in Angular frameworks. Learning new languages and technologies is what I am passionate about. I am considered a team-player because i like to help other and tend to work well within groups.

EDUCATION

British College BTEC FPT

2019 - 2022

Information technology

Grade: Pass

CERTIFICATIONS

ACADEMIC PREPARATORY ENGLISH Level 5 Course Completion Certificate - summit 1

2022

SKILLS

Soft skills

- Clear and concise communication with team members, stakeholders, and non-technical personnel.
- Ability to explain complex technical concepts to non-technical individuals.
- Demonstrated ability to work effectively in a team environment.
- Experience in collaborating with cross-functional teams to achieve project goals.
- Strong analytical and problem-solving skills.
- Proven ability to troubleshoot and debug issues efficiently.

Foreign language

English: IELTS 5.0

Technical skill

- Passionate about technology & solving problems with clean, SOLID code.
- Strong experience in javascript(Nestjs, Angular, ReactJS, React Native)
- Solid knowledge in most aspects of Web Apps Development such as project integration, optimizing web app performance, optimizing CI/CD,..as well as developing new add-on features.
- Experienced Software Engineer with 2 years of experience in various scopes of work, strong at frontend development./n
- Technical Expertise:
 - Programing language: javascript (2 YoE).
 - Understanding javascript runtime NodeJS
 - Javascript framework like ExpressJS/ NestJS/ Angular/ ReactJS/ React Native
 - Familiar with css library and pre-processor SCSS, TailwindCSS, PrimeNG
 - Familiar with javascript library: RxJS, lodash, Echart, ChartJS, CKEditor, ...
 - Can work on Linux
 - Understanding Docker, CICD
 - Domain knowledge: Insurance, Ecommerce

WORK EXPERIENCE

Frontend developer

- Outsource for MB Ageas life projects BPM, Adhoc Vconnect
- Complete the tasks assigned by the team leader Participate in building and developing UI, UX in accordance with customer needs
- Plan and design codeflow, workflow for frontend project
- Conduct thorough debugging to isolate and resolve problems efficiently.
- Stay informed about security vulnerabilities and updates related to frontend technologies.

Compedia Joint Stock Company

01/2022 - 02/2023

Frontend developer

- Complete the tasks assigned by the team leader Participate in building and developing UI, UX in accordance with customer needs
- Standardize all outputs with a new strategy and approach that prioritizes mobile devices.
- Collaborate with development team members to implement and develop new features.
- Implement PayPal, VNPAY integration to match the payment business on e-commerce platform
- Integrate login with Google and Facebook to serve the login needs of users on the e-commerce platform
- App development and implementation on AppStore and GooglePlay platforms
- Maintain and develop mobile applications for company products

PROJECTS

Adhoc VConnect
(03/2023 - 12/2023)

Customer	Insurance company
Description project	Adhoc Vconnect is a system created for the purpose of executing repetitive queries such as adding, editing, deleting and reporting quickly with charts, exporting excel reports to serve the needs of the operation and maintenance for insurance company
Team size	6
Position	Frontend developer
Responsibility in project	<ul style="list-style-type: none">• Implementing the construction of code base, services, components, and interceptor for the project• Develop reusable and modular components for efficient frontend development.• Collaborate with design teams to iterate on UI/UX based on user feedback..• Implement planning and develop base on customer ticket• Advise solutions during product management feature definition, weighing in technical limitations• Integrate with backend services and RESTful APIs to retrieve and update data.• Optimize frontend performance by implementing best practices in code splitting, lazy loading, and bundling.

	<ul style="list-style-type: none"> • Utilize version control systems (e.g., Git) for efficient code collaboration and tracking changes. • Contribute to functional definition of customer requirements • Work closely with project managers, team leads, and other stakeholders to gather requirements
Technology description	

BPM Platform

(03/2023 - 12/2023)

Customer	Insurance company
Description project	BPM platform was developed to optimize the business processes of the company's insurance products. Can only be circulated internally within the company
Team size	15
Position	Frontend developer
Responsibility in project	<ul style="list-style-type: none"> • Build UI for website follow document and design for workflow on BPM • Implement planning and develop base on customer ticket • Advise solutions during product management feature definition, weighing in technical limitations • Contribute to functional definition of customer requirements • Implement process improvements to enhance operational efficiency and reduce bottlenecks. • Collaborate with system architects and integration specialists to integrate solutions seamlessly with existing insurance systems • Collaborate with deployment teams to ensure smooth and error-free deployment of solutions. • Provide technical support for end-users and address any issues related to frontend
Technology description	

Konva Nest

(09/2023 - 12/2023)

Customer	Personal
Description project	Konva Nest is a personal project developed on NestJS to solve the issue of generating images on the backend. It utilizes the Konva library to recreate the canvas in the browser and generates images through node-canvas. To optimize the project, Minio is used as the storage location for user images, and Redis, along with BullMQ, is employed to handle image generation jobs
Team size	1
Position	Full stack developer
Responsibility in project	<ul style="list-style-type: none"> • Building the project as a microservice involves developing and testing image generation features as services. • Setup CI for service with gitlab runner • Deploying service using Docker • Optimizing the service with Redis and BullMQ for scalable service.
Technology description	<ul style="list-style-type: none"> • Tech stack: KonvaJS, NestJS, NodeJS, BullMQ, Redis, Docker, Docker Compose, Gitlab CI • Github page: https://github.com/proselin/knoxva_nest

Tickmi V 1.0

(07/2022 - 02/2023)

--	--

Customer	Compedia Joint Stock Company
Description project	Tickmi is an e-commerce platform development project sell and create QR tickets for events, train tickets and other fields.
Team size	10
Position	Frontend developer, mobile app developer
Responsibility in project	<ul style="list-style-type: none"> • Build UI for website Perform business building, UX for a number of payment modules, buy tickets, display ticket details, display service package details,.... • Working with Backend, calling API to perform display, add, edit, delete,.... • Convert Client-Side Rendering to Server-Side Rendering to optimize SEO on Angular • Make a responsive website suitable for both PC and mobile devices • Develop login feature with google and facebook accounts. • Integrated payment by VNPAY, PayPal • Implement SEO and optimize SEO for the project • Developing mobile apps using React Native • Develop multi-language display on both website and mobile app
Technology description	<ul style="list-style-type: none"> • Implement website development on Angular 13 framework using HTML, CSS, Javascript and Typescript Integrated login with google account, facebook • Integrated payment by PayPal, VNPAY • Develop mobile apps using React Native and Redux

MVS

(03/2022 - 02/2023)

Customer	Viettel Commerce Single-member limited liability company
Description project	Mvs is a project to support learning and professional guidance to improve the quality of employees in the Viettel system.
Your team size	6
Position	Frontend developer, mobile app developer
Responsibility in project	<ul style="list-style-type: none"> • Build UI for website Implement professional development, UX for a number of modules for learning, testing, and student management • Working with Backend, calling API to perform display, add, edit, delete,.... • Developing mobile apps using React Native
Technology description	<ul style="list-style-type: none"> • Angular 13, typescript, React Native, Tailwin CSS, Primeng, redux
